

CHT R. Beitlich GmbH converts 100 % to green power

16.01.2015: CHT R. Beitlich GmbH with its headquarters in Tübingen converted to green power in all of its German sites. Since January 1st, 2015 the sites in Tübingen, Dusslingen, Geretsried and Oyten are demonstrably fed with power coming exclusively from hydroelectric power plants.

The power in use is completely from plants of renewable power generation and is certified by TÜV Nord (Northern German technical monitoring institute).

"We are aware of our social responsibility as chemical company", the Management in Tübingen states, "therefore, besides our other company values, sustainability is of major importance for our company policy".

The conversion to power from renewable energy sources also bears of course extra financial expense, which must be thoroughly evaluated by an energy intensive company such as CHT which faces price-sensitive competition all over the world. "Within the framework of our sustainability commitment we consider this extra expense to be worth it", says the Management.

The complete Group has already defined and initiated numerous actions and products to promote sustainability under the slogan "We take care for sustainability".

Unique Ideas. Unique Solutions – The CHT/BEZEMA Group

Since the establishment of CHT R. Beitlich GmbH in Tübingen more than 60 years ago, the CHT/BEZEMA Group has developed into a worldwide company group focusing on special chemicals used as auxiliaries and additives as well for functionalization within industrial processes.

With over 1,700 employees employed by 20 companies, we are very close to our customers on every market. Together with our representatives we provide our customers with our products and services in over 60 countries on every continent.

Then as now, the head office and the centres of competence of different business fields are located in the university town of Tübingen. The dyes are sold by the sister company BEZEMA AG in Montlingen (Switzerland). The corresponding competence centre is also located there.

By combining the strenghts of the entire group we continuously develop innovative products, applications and processes. Highly qualified professionals work at state-of-the-art laboratories in development, analysis and application technology to develop new ideas and solutions to meet the most modern requirements.

Our products help improve the quality, functionality and performance of textiles, construction materials, dyes, paint & coatings and paper, but also cleaning and care products for different fields of application.
