

Innovative and sustainable - More safety and improved washing processes through the new developments of the textile specialist

The CHT/BEZEMA Group presents innovative solutions for the Textile care industry at TEXCARE International 2016 in Frankfurt/Main.

Get an idea of our profile and our range of services and visit us from 11th-15th of June 2016 at TEXCARE 2016, stand C32 in hall 8.

Washing without chlorine and per-acids

The CHT/BEZEMA Group introduces with SMART BLUE ACTIVE a new, sustainable washing process. Washing without chlorine and per-acids not only increases the safety in operation, it also improves the quality and durability of textiles. This new development shows that it is a great need for CHT to develop outstanding and efficient products and to contribute every day to make industrial washing processes safer, more flexible and efficient.

Natural cleanliness

The newly developed detergent BEICLEAN NATURAL is based on surfactants made of 100 % renewable raw materials.

The ecological detergent offers besides outstanding wash results also a sustainable process.

Ecological harmlessness as well as an optimal combination with other CHT products (Washing process & finishing) complete the quality characteristics of BEICLEAN NATURAL.

The product is suitable for all types of laundry as hotel laundry, hospital linen, workwear, catering textiles, feathers and downs.
