CHT's paper chemicals - High performance chemistry

The CHT/BEZEMA Group presents at this year's Zellcheming-EXPO products and process solutions which support its partners with the embodiment of sustainable processes.

"We focus especially on the development of additives for the paper and pulp industry which enables our partners to save resources", S. Held-Beller, Head of the Business Unit Pulp & Paper.

Rising energy costs and continuous process optimization are current issues for everybody.

Our product concept based on specific enzymes and additives ensures an optimal and efficient use of raw materials as well as well as energy savings in the production of packaging papers.

We gladly explain to you our concepts for enhancement and stabilization of the whiteness which is being achieved during the bleaching process and which offers various approaches towards cost and process optimization - in the pulp and ground wood bleaching as well as in the bleaching of waste paper.

Furthermore, the topic of surface functionalization is still a focal point of our product development. Without fluorocarbon and, in addition, completely recyclable, our products enable the production of modern, sustainable food packaging.

We will be pleased to support you with innovative concepts and special chemicals which may support your successful product positioning on the market.

Learn more about the CHT/BEZEMA Group and its innovative concepts! Visit our stand 11.0 – B10 at Zellcheming in Frankfurt/ Main from the 28th until the 30th of June 2016.

CHT R. BEITLICH GmbH – an innovative system supplier

The worldwide operating CHT/ BEZEMA Group for speciality chemicals has its headquarters at CHT R. Beitlich GmbH in Tübingen. Our products improve the quality, the functionality and the performance of textiles, building materials,
