April 2019

FESPA Munich 2019

Sustainable Performance in Textile Printing with CHT Textile Solutions

Do sustainability and performance have to be opposites? No, they don't! The demand for textiles produced in an environmentally friendly way is increasing and so are the ecological requirements for the entire textile industry. However, even under these increasing demands, the performance of textile auxiliaries does not have to be impaired. The CHT Group offers you a comprehensive know-how along the textile value chain operating as specialist for environmentally friendly products without any compromise.

Textile printing can be innovative and highly efficient – let us convince you of our auxiliaries for screen printing and transfer systems:

The most recent generation of CHT screen printing silicones, ALPAPRINT NG, are the environmentally friendly alternative to plastisol inks as well as PVC and are free of critical softeners. With our silicone printing pastes, you achieve remarkable results without harmful components. They convince with their easy handling, excellent running properties and high covering power with excellent fastness properties as well as excellent elasticity and durability. Therefore, the ALPAPRINT NG series is perfectly suited for outdoor- and sportswear.

The water-based printing pastes, PRINTPERFEKT CLEAR 680 FF and WHITE 680 FF, are also without alternative when it comes to environmentally friendly printing. They are GOTS and bluesign® listed and excellently complete our formaldehyde-free product range.

With TUBIJET DTG 500 Primer for spray application in inkjet printing, you achieve optimum results in bonding white ink to textiles. The print attains an outstanding contour sharpness as well as homogeneity of the white ink and therefore brilliant colours. Suitable for white and dark garments, it is universally applicable and gives you a high degree of flexibility in inkjet pretreatment.

Multicolour design, but the printing carousel is too small? No problem! The PRINTPERFEKT S2S printing paste system enables wet-on-wet printing and prevents you from drying between colours in multicolour designs. It provides you with a higher flexibility in production and significantly reduced energy costs.

These and many other highlights will be presented to you at FESPA in Munich, Stand C53 in Hall A6, from 14 to 17 May 2019.

We are looking forward to your visit.

About the CHT Group

The CHT Group, a medium-sized global player for speciality chemistry, is worldwide active in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimise their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, paper, agrochemicals as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By bundling the strengths of the complete group further innovative products, applications or processes are permanently developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by more than 29 companies worldwide. In the financial year 2017, the CHT Group generated a group turnover of 440 million Euro with around 2,200 employees.
