

PRESS RELEASE

04 March 2025

CHT's BF Construction & Assembly and BU Industrial Production showcase innovative products and solutions at the European Coatings Show 2025 in Nuremberg

- **Powerful additives for industrial coating systems, printing inks, concrete, and architectural paints**
- **Antifoams and defoamers for industrial processes**
- **Additives for leather formulators**

Powerful additives for industrial coating systems, printing inks, concrete and architectural paints

Our highly effective additives and binders provide the decisive add-on for your products. Our ECS highlights:

- **AGOCEL® AC 1147 rheological additive**, our new anti-spatter additive for architectural paints; guar gum base
- PFAS-free, REACH SVHC-compliant **SILCO® surface additives** for improved wetting, leveling, and slip in various coating systems
- Comprehensive relaunch of our defoamer technology **SPACTIVE® defoamers**
- **TECOSIT® film formers**, our high-performance specialty polymers for efficient, long-lasting film properties
- **ULTRALUBE® GA 1090** bio-based alternative to HPDE with reduced CO₂ footprint
- **VARIPHOB® AC 3030 hydrophobic agent** for an innovative combination of breathability and reduced water absorption

Antifoams and defoamers for industrial processes

Our **BU Industrial Production** presents its latest antifoams and defoamers for industrial applications.

CHT's highly concentrated **HANSA® XFOAM solutions** based on tailor-made polysiloxanes combine high process safety with long-term performance. Our silicone-based antifoams and defoamers are highly efficient even at low dosages, have excellent persistence and are effective on macro and micro foam. The final performance will be affected by the level of material incompatibility in the application.

CHT's silicone-based antifoams and defoamers are used in chemical additives, distillation & extraction processes, pulp & paper, wastewater treatment, metalworking fluids & lubricants, agriculture formulations, and food & beverage processing.

Additives for leather formulators

Our **BU Industrial Production** also presents to you the latest **HANSA® PROOF solutions** for leather formulators which can be used to achieve first-class water repellency. These innovative fluorocarbon-free polysiloxanes meet international standards and offer tailor-made, sustainable solutions for your customers. With our specifically developed portfolio of **HANSA® TOUCH products**, you can achieve perfect leather finishing on shoes, clothes, car upholstery or upholstered furniture.

Visit us at our **Booth 3A-338** from **March 25-27, 2025** and convince yourself of our latest additives for C&A and for leather production as well as of our antifoams and defoamers for industrial processes.

About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, leather, release agents, paper, agrochemicals, mining as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by 27 companies worldwide. In the financial year 2024, the CHT Group generated a group turnover of 614 million Euro with approx. 2,500 employees.
