

## PRESS RELEASE

19 February 2025

### CHT showcases sustainable innovations at the PERFORMANCE DAYS SPRING Functional Fabric Fair in Munich

CHT, a global specialist in textile chemistry and dyes, is looking forward to participating in the **PERFORMANCE DAYS Functional Fabric Fair in Munich on March 5 and 6, 2025**. At the fair, we will be showcasing our latest sustainable textile technologies - with a focus on innovative dyeing processes and functional finishes that specifically improve textile properties.

Our trade fair highlights:

- **PIGMENTURA by CHT** - Our innovative, pigment-based dyeing process uses no water at all for soaping and rinsing and does not require energy-intensive heating of the process water. As a result, water consumption in the dyeing process can be reduced by up to 96 %. This pioneering technology was awarded the **German Federal Ecodesign Award** in the Product category in 2024 - a result of the successful collaboration between Inditex and CHT.
- **ECOPRINT by CHT** - Our water-based textile printing system with reactive and pigment inks meets the highest sustainability standards and has been awarded the C2C Certified Material Health Certificate™. It actively contributes to converting linear production processes into circular systems and promoting the textile circular economy.
- **TUBINGAL® RISE** - Our innovative softener is made from recycled end-of-life silicones and consists of over 60 % recycled silicone waste and emulsifiers from renewable raw materials. CHT is thus setting new standards for sustainable softeners in the textile industry.

- **ARRISTAN rAIR** - Our sustainable hydrophilic finish is made from recycled PET flakes and ensures optimum moisture regulation, fast drying and excellent dirt repellency. ARRISTAN rAIR is ideal for finishing recycled yarns and fabrics, which can then be recycled again - an important contribution to the textile circular economy.

In 2024, CHT was once again awarded the **adiformulator Award** by adidas as a champion for sustainable innovation - for the second time in a row. This honor underscores our commitment to actively shaping the future of the textile industry with sustainable solutions.

As a foundation-owned company, CHT is committed to a comprehensive sustainability agenda. Our products are designed and manufactured according to strict standards, with a focus on using bio-based, biodegradable and recycled materials to support a circular economy.

Visit us at our **booth E11** at the **PERFORMANCE DAYS SPRING Functional Fabric Fair in Munich** and discover our sustainable innovations. Our team is looking forward to presenting our products and giving you exciting insights into the textile future!

### **About the CHT Group**

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, leather, release agents, paper, agrochemicals, mining as well as cleaning and care products innovative products and process solutions are provided by the Business Field INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by 27 companies worldwide. In the financial year 2024, the CHT Group generated a group turnover of 614 million Euro with approx. 2,500 employees.
