

PRESS RELEASE

01 June 2022

CHT Group is exhibitor at the trade fair Plastics Recycling Show Europe 2022

- **CHT Group will have its own stand at PRSE in Amsterdam from 22 to 23 June 2022**
- **Presentation of auxiliaries for quality improvement and process optimization in the plastics cleaning process**
- **This year's highlight: nomination for the Plastics Recycling Awards Europe 2022 with the detergent refill system "My Bottle, please!"**

From 22 to 23 June, 2022, the CHT Group will be an exhibitor at the Plastics Recycling Show Europe (PRSE) at the Rai Congress Center in Amsterdam and will have its own stand (stand D2 in hall 12) to present intelligent auxiliaries for quality improvement and process optimization in the aqueous plastics cleaning process.

Since 2017, the PRSE fair has brought together experts from the entire plastics recycling value chain in Amsterdam to discuss the latest developments and advances in the omnipresent plastics recycling.

This year's highlight of CHT Group's participation in the fair is its nomination for the Plastics Recycling Awards Europe 2022 with the detergent refill system "My Bottle, please!". This is a system that uses a fully digital filling machine to fill CHT Group's sustainable LAVECO+ liquid laundry detergent into reusable PET bottles made from 100% recycled material. Thus, an entire plastic bottle can be saved with each refill.

CHT Group's focus at this year's PRSE is on the following products for plastics recycling:

- **TUBIWASH** is a cleaning agent for plastics recycling with a high cleaning efficiency that leads to an outstanding flake quality, thus contributing to quality improvement. The TUBIWASH portfolio comprises even special products that support the decolorization of packaging materials.
- **TUBIFOAM** serves as an efficient process aid based on sustainable raw materials for the elimination of process foam. Small application quantities already promise smooth machine running and trouble-free water treatment. Mineral oil defoamers are not used in the interests of sustainability and health.
- **TUBIWET** are high-performance deaerators that ensure a density-based separation of the individual plastics by type (e.g. PET and PE) in the water bath.
- **TUBILAY** is used in the film extrusion or bottle blowing process to provide optimum separation from the tool and to form a protective barrier for the subsequent transport.
- **TUBIFLOC** is a polymeric flocculant for the increasingly important water treatment in plastics recycling. Thus, the process water can be reused in the cleaning process or, if necessary, discharged cleanly.

Visit us from 22 to 23 June, 2022 at our stand D2 in hall 12 at PRSE and convince yourself of our intelligent auxiliaries for quality improvement and process optimization in the plastics cleaning process.

About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, paper, agrochemicals as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by more than 26 companies worldwide. In the financial year 2021, the CHT Group generated a group turnover of 630 million Euro with around 2,400 employees.
