

PRESS RELEASE

31 May 2022

CHT Group is exhibitor at the paper trade fair ZELLCHEMING-Expo 2022

- From June 29 to July 1, 2022, the CHT Group will be represented with its own booth at the paper trade fair ZELLCHEMING-Expo
- In the spotlight: sustainable technologies for paper coating
- Product innovation BIOLAY: natural barrier product against fats and oils in the food sector

From June 29 to July 1, 2022, CHT Group will be an exhibitor at the ZELLCHEMING-Expo RheinMain CongressCenter (RMCC) in Wiesbaden, Germany, and will have its own booth (booth space 62, Hall North) to present its sustainable technologies for paper coating.

ZELLCHEMING-Expo is the trade fair for the latest developments of the European paper, pulp and fiber industry and its suppliers at the main production site of the EU.

The CHT Group sees itself as a partner for sustainable products and solutions to optimally support paper producers in achieving their sustainability goals. These sustainability goals can be energy and resource savings, a high recycling rate, the reduction of CO₂ emissions and the use of purely natural products to support the circular economy.

Therefore, at this year's ZELLCHEMING Expo, CHT Group will focus on newly developed sustainable barrier products against fats and oils. Since the Single-Use Plastics Directive EU 2019/904 came into force, certain single-use packaging materials have been subject to mandatory labeling or have been banned altogether. Against this background, CHT Group has initiated the new development of the innovative BIOLAY barrier products against fats and oils.

BIOLAY is a natural barrier product against fats and oils to package food safely and sustainably while protecting the environment. The innovative product is completely free from synthetically produced compounds. It is 100% biodegradable and free from microplastics and fluorocarbons. The newly developed BIOLAY barrier products can be precisely adapted to the necessary requirements by using further additives such as CHT-COAT WAX. The production of the basic paper can also be made more sustainable thanks to CHT enzyme products (Quimizime/ZIAX).

The newly developed solutions of the CHT Group support the transition from the fossil age to a sustainable circular economy.

Visit us from June 29 to July 1, 2022 at our booth (booth space 62, Hall North) at the ZELLCHEMING-Expo in Wiesbaden and convince yourself of our sustainable technologies for paper coating.

About the CHT Group

The CHT Group is a medium-sized global player for specialty chemicals and active worldwide in development, production and sales. CHT Germany GmbH in Tübingen is the headquarters of the group of companies which focuses on sustainable chemical products and process solutions.

TEXTILE SOLUTIONS of CHT improve the quality, functionality as well as look and purity of textiles and optimize their manufacturing processes.

In the fields of silicones, building materials, paints, coatings, paper, agrochemicals as well as cleaning and care products innovative products and process solutions are provided by INDUSTRY SOLUTIONS.

By combining the strengths of the complete group further innovative products, applications or processes are continually developed and vast technical support is offered within the SCIENCE & SERVICE SOLUTIONS. Highly qualified specialists work in state-of-the art laboratories for development, analytics and application technique in order to work out ideas and solutions that meet the latest requirements.

The CHT Group with its own production and sales locations is represented by more than 26 companies worldwide. In the financial year 2021, the CHT Group generated a group turnover of 630 million Euro with around 2,400 employees.
